Software: Microsoft Exchange; Microsoft Office; Enterprise Content Mgmt. (M-Files); **ESRI**: Desktop, Server, Portal & Collector
Security: SonicWALL Firewall, SonicWALL Email Security

KEY IT ACCOMPLISHMENTS

- Researched, implemented & wrote scripts to insert data from Telemetry device into SQL database; which monitors water depth of wells in the High Plains Underground Water Conservation District. Managed well site equipment install, and continue to monitor daily function of the system. Well depth is recorded & displayed in real-time Database for all users, allowing reduction in field staff and savings to the District.
- Developed and wrote scripts for Interactive Well Map of the aquifer with Database available to staff and clients; providing complete drill down history, as well as current information on the wells.
- Digitized well records; 70,000 documents representing 65 years of aquifer management, allowing reduction in office staff and time savings by eliminating manual search of paper records.
